

ENVIRONMENT POLICY

RS MECCANICA SRL (hereinafter RSM) has adopted an Organization, Management and Control Model (OMCM) and prepared a Code of Ethics and Behavior (Code) as official documents to express the commitments and ethical responsibilities in the conduct of business and activities adopted for the purpose of reasonably preventing environmental crimes.

ENVIRONMENT POLICY

The general part of the OMCM and of the Code is available on the institutional website.

The Environmental Policy is inspired by the paragraph § 2.15 “Environmental protection, respect for the community” of the aforementioned Code.

RSM desires to protect the environment, with preventive and protective measures against accidental pollution of the air, land and water. RSM will remain in compliance with and observance of national and international law, the current regulations of Italy and in all the countries in which it operates.

The aims and environmental goals of the Environmental Policy are:

- Protect the environment and promote environmental protection by identifying the environmental aspects of which one's activities may have the greatest impact;

ENVIRONMENT POLICY

- Use hermetically sealed refrigeration equipment for indoor spaces and work stations with GWP <2500 and from 2022.01.01 with GWP <150;
- Optimize production through waste management with the promotion of recycling and recovery activities;
- Improve energy efficiency through the continuous updating of work stations and systems, with the installation of lower energy consumption devices;
- Train and raise awareness among our staff to respect the environment through less consumption of natural resources and proper waste management;
- The continuous improvement of our environmental performance;

ENVIRONMENT POLICY

- The selection of environmentally aware and compliant suppliers and promote the adoption of environmentally friendly rules of conduct among all stakeholders;
- Purchase raw materials and commercial components in compliance with the regulatory compendium considering the entire life cycle, considering disposal and recycling of a resource;
- Measure and monitor environmental data in order to assess environmental, health and safety performance, while maintaining maximum transparency towards all stakeholders;
- Respect the laws of the local and European regulatory compendium

ENVIRONMENT POLICY

The tools through which RSM maintains the commitments made are:

- The maintenance of the OMCM through periodic audits with the Supervisory Body;
- The management review on an annual basis;
- The continuous improvement of a simple and effective production, energy and environmental systems;
- Updating and maintainig adequate internal, human and financial resources
- Control of suppliers, rewarding the most environmentally friendly suppliers;
- Sharing with our customers experience and knowledge to achieve responsible environmental behavior in terms of environmental protection;

ENVIRONMENT POLICY

- The continuous application of the risk-based approach with the analysis of risks and opportunities;
- The updating of the Environmental Policy considering the evolution of the regulatory compendium,
